

# Acknowledgments

MBF Prevention Education Programs are comprehensive, evidence-based and trauma-informed primary prevention programs developed by the Monique Burr Foundation for Children (MBF). The programs educate and empower youth with the MBF 5 Safety Rules® to prevent, recognize, and respond appropriately to all types of child abuse, bullying, cyberbullying, digital dangers, exploitation, and human trafficking. The programs were developed by a team of subject matter experts and educators with the goals of producing quality content based on sound theoretical and pedagogical concepts and best practices for prevention education while ensuring the programs are practical and easy for facilitators to present and developmentally appropriate, fun, and engaging for youth.
